

# Different Angles on Accreting Supermassive Black Holes

*Friday 23 June 2023 14:35 (35 minutes)*

In this talk I will review the phenomenology of accreting supermassive black holes and their jets. The understanding that has emerged from their systematics at multiple frequencies, combined with the results from computational simulations and connections with properties of their host galaxies and their evolution will be discussed.

**Presenter:** Prof. SHASTRI, Prajval

**Session Classification:** SMBHs: growth and feedback
